

Jim Battersby is the President and Senior Consultant for J.R.B. and Associates a certified SB/DVBE firm in the State of California since 1990. Mr. Battersby has extensive experience in assisting clients with their procedural, physical and electronic security requirements and design. He has worked with "Fortune 500" companies in the areas of entertainment, consumer products, aerospace and the healthcare industries as well as local municipalities and educational facilities in conducting threat analysis and premises liability surveys.

His work has saved clients not only money but the aggravation of improperly chosen or designed security systems to include access control, closed circuit television and intrusion systems.

Mr. Battersby is well known for his ability to evaluate security technology and its appropriate application. He works very closely with clients in a "project management" capacity making certain that their security systems are properly chosen, designed and installed. He has over 30 years of experience in the security field. Mr. Battersby has been involved in major projects involving CCTV with fiber optics and electronic access control systems.

Mr. Battersby has been the President of a company that specialized in the sales, service and installation of security devices. In this capacity, he was named "vendor of the year" by a major subcontractor to the federal government. He has extensive training in the security industry and academic training in Business Administration and Sales. He has completed extensive training in Integrated Security Systems Design, CCTV with fiber optics / telephone transmission, Building and Fire Codes, Locksmithing, Safes and Vaults, Computer and Network Security Management and Computer Graphic Design.

Mr. Battersby has extensive manufacturers training from companies that manufacturer, sell and/or install security systems.
